## **Specialist Dementia Care Program Open Day**

**You're invited to the Specialist Dementia Care Program Open Day**

**Tuesday 24 March 2026**

The Department of Health, Disability and Ageing Local Network and Anglicare Southern Queensland invite you to an open day at St Martin's Specialist Dementia Care Program (SDCP) unit in Taigum.

The SDCP supports people with very severe behavioural and psychological symptoms of dementia. St Martins offers high-level and tailored care for individuals living with dementia within a supportive environment. When the person no longer needs the specialist care, St Martins plan and support the person's transition into permanent residential care.

### **About the Open Day**

The open day is tailored for residential aged care Facility and Clinical Managers, General Practitioners and Geriatricians in the Brisbane North.

The aim is to increase awareness about the:

- Specialist Dementia Care Program and care approaches

- clinical in-reach supports provided by Metro North Hospital and Health services
- referral and assessment processes
- transition supports provided to residential aged care homes.

There will also be an interactive discussion on potential barriers and risks associated with caring for people who display behavioural and psychological symptoms of dementia, and an opportunity to network with local aged care and medical professionals.

### **Details**
