## Sexualities and Dementia

### Workshop overview:

Sexual expression is a part of life no matter what age we are and therefore older people living with dementia also need to be considered. In an aged care context, this can be a confronting and challenging issue for service providers and health professionals.

This workshop will:

- Focus on building workforce capacity in understanding the concepts of intimacy, sexuality and sexual behaviours, and expression of various types of sexuality (i.e. heterosexual and LGBTI)
- Discuss the benefits and barriers to expression of sexuality
- Consider the roles and responsibilities of health care professionals, and ethical considerations.

Lunch will be provided from 12.30pm.

**To Register:**

<https://tinyurl.com/yfxykzd6>

(choose one session only)

**Who should attend?**

Nurses, Support workers and Allied Health staff caring for people living with dementia in residential aged care

(Please note: This workshop is only open to health professionals working in the [Brisbane North PHN region](#)).
