

UPDATE: Further changes to Caboolture Gastroenterology Outpatient Service

To provide equitable access to Gastroenterology Services and enable timely patient review, Caboolture Gastroenterology Outpatient Service is temporarily redirecting all new referrals to other Metro North facilities. Patients currently waiting on the Caboolture Gastroenterology waitlist may also have their care transferred.

Please discuss these changes with your patient at the time of referral so they are aware that their care will be transferred to another Metro North facility.

Please continue to direct referrals to Caboolture Hospital where they will then be reallocated to either Surgical Treatment and Rehabilitation Service (STARS), Royal Brisbane and Women's Hospital (RBWH), The Prince Charles Hospital (TPCH) or Redcliffe Hospital.

The patient will be contacted by Metro North staff, however if unsuccessful the referral will still be redirected to another Metro North facility.

You will receive written confirmation from the facility at which your patient has been waitlisted. If you have further questions regarding the transfer of your patient's care, please contact the facility on the number provided in the letter.
