

Common challenges in primary care: Immunology and ENT

Tuesday 27 February 2024

Metro North Health and Brisbane North PHN invite GPs and practice nurses to join our panel of experts for an evening of education and discussion.

Join your general practice colleagues for an online education webinar jointly presented by the RBWH Clinical Immunology and Allergy and Ear Nose and Throat teams.

The webinar will cover assessment, management and optimization of community care for patients with rhinitis and rhinosinusitis (including allergic, perennial and chronic). There will be a particular emphasis on areas such as allergy testing, use of biologics and surgical indications in the management of these patients.

There will be an opportunity to engage with our panel of experts about advice on management, referral pathways and support services that may be useful for you in primary care.

EVENT DETAILS

DATE:

Tuesday 27 February 2024
