

Training Opportunity

Chronic disease care planning

Your practice is invited to join a full day virtual training course **Chronic Disease Care Planning** to enhance your team's skills in managing chronic disease care.

Clinical primary care staff, including GPs, practice nurses, registered nurses and enrolled nurses are encouraged to attend and learn how to:

- develop patient care plans for chronic diseases
- implement health interventions that identify risk factors
- support behaviour changes that lead to improved health outcomes.

Pre-requisite:

Students must complete the Foundations of Chronic Disease online module to enrol in this program.

This is a fully funded online offering with limited places available.
