

Training Opportunity

Wound Management - Advanced Practice

Brisbane North PHN, in collaboration with Benchmark, is excited to offer a fully funded training opportunity for nurses: **Wound Management - Advanced Practice**.

Enhance your skills in wound assessment, care, and patient education with this hands-on and practical program.

This comprehensive program is designed to:

- Identify various wound types and select appropriate dressings to promote effective healing.
- Cover the principles of wound assessment and compliance with wound swab culture best practices.
- Provide tools for clinical documentation, report writing, and patient education on chronic wound prevention strategies.

In light of the limited capacity for this training opportunity and our commitment to fairness among practices, we can only offer one spot per general practice. Thank you for your understanding.

For more information email primarycareevents@brisbanenorthphn.org.au.
