Supporting people with dementia in a general practice setting

This workshop aims to improve the knowledge and skills of practice nurses to more confidently manage the care of people living with dementia in the general practice setting.

Learning Outcomes:

By attending this workshop, participants will have increased their **confidence, knowledge** and **skills** to enable them to:

- Recognise the difference between normal aging and dementia
- Recognise and identify people living with dementia in the general practice setting
- Recognise modifiable risk factors that impact on the progression of dementia
- Develop and implement an effective management plan for people living with dementia at different stages of the disease
- Locate current resources and information to support people living with dementia, their families and carers.
