# Caboolture Hospital Redevelopment

- Over the next three years, Caboolture Hospital will undergo a major expansion and redevelopment to build a bigger and better hospital with more health services and improved parking for the community.
- The \$399.5 million Caboolture Hospital Redevelopment Project includes a new Clinical Services Building, a new multi-storey carpark, an expansion and refurbishment program that will enhance and modernise spaces within a number of areas of the existing hospital and a new Building Engineering and Maintenance Services (BEMS) facility.

# New Clinical Services Building

- The new Clinical Services Building is scheduled to welcome its first patient in 2023.
- It will sit between the existing Caboolture Hospital and McKean Street.
- With linkways on Levels 1 and 2, patients, visitors and staff will easily move between the new and existing buildings.
- It will include:

– New and expanded Emergency Department with Satellite Medical Imaging	– New Geriatric Evaluation & Management Unit
– New Main Entry, café and Visitor’s Lounge	– Intensive Care Unit with single patient rooms
– Outdoor courtyard	– Cardiac Care and Cardiac Sciences Unit
– Two new Medical Wards	– Planned Procedure Unit
– Palliative Care Unit	– New perioperative unit with 6 OTs

# Key Spaces - Main Entry

Central Courtyard

Central Courtyard

## More Single Patient Rooms

# New Multi-Storey Carpark

- Safe, accessible and affordable parking for staff, patients and visitors is a top priority.
- The new six floor multi-storey carpark includes over 1,000 parking spaces in a mix of multi-story and at-grade facilities.
- It will be close to the new Clinical Services Building and includes accessible parking spaces, charging stations for electric vehicles and motorcycle parking.
- When it opens in 2023, a fee will apply to park on the Caboolture Hospital campus.

# Refurbishment in existing hospital

A significant refurbishment program will also be delivered and will enhance and modernise spaces within the existing hospital, including:

- Expanded Pathology, Pharmacy and Medical Records Facility
- Kitchen Refurbishment
- New Medical Day Unit and Self-Care Dialysis
- New Central Sterilising Department
- Expanded Neonatal Unit
- Transit Lounge

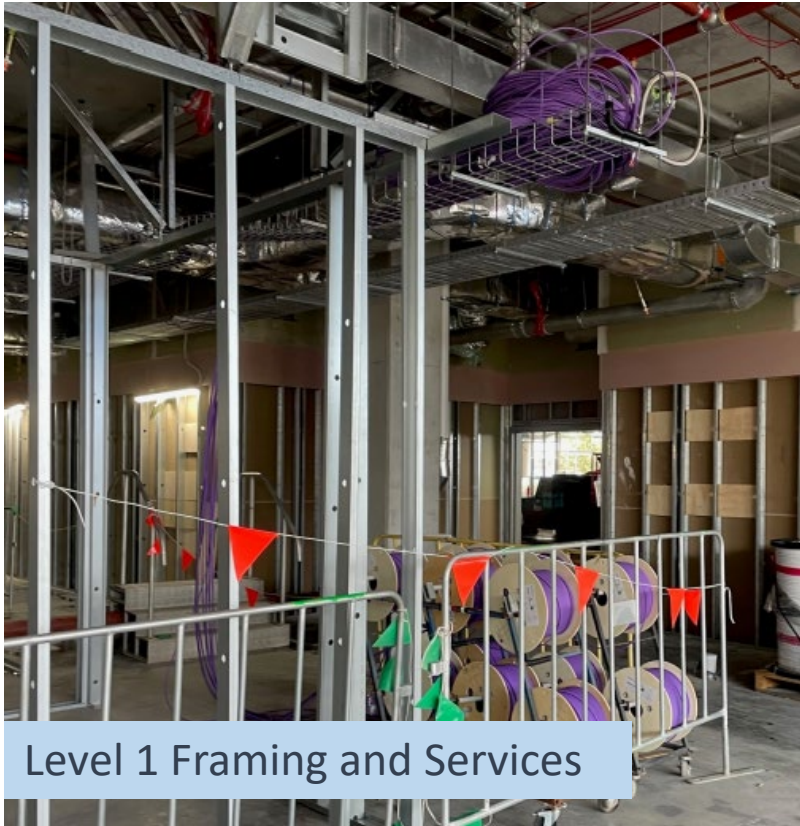

# Construction Update

- Construction on the Clinical Services Building began in 2020
- Concrete pours for the level 4 floor slab in the new five storey Clinical Services Building have commenced.
- Concrete pours for the level 3 floor slab on the Multi-Storey Carpark site are underway.
- Concrete pours to create the ground beams for the new BEMS building have commenced. The ground beams rest directly on the concrete piles and serve as the building's foundation.
